For example: -

There are four methods to updating Reallusion software to the latest version

**Method#3:** Double-click the "RL" icon on the task bar (on the lower-right corner of the window) when your program is running. Just click "Update" to start the updates.

\*Note: You can find the downloaded patch under below folder, before the computer reboots.

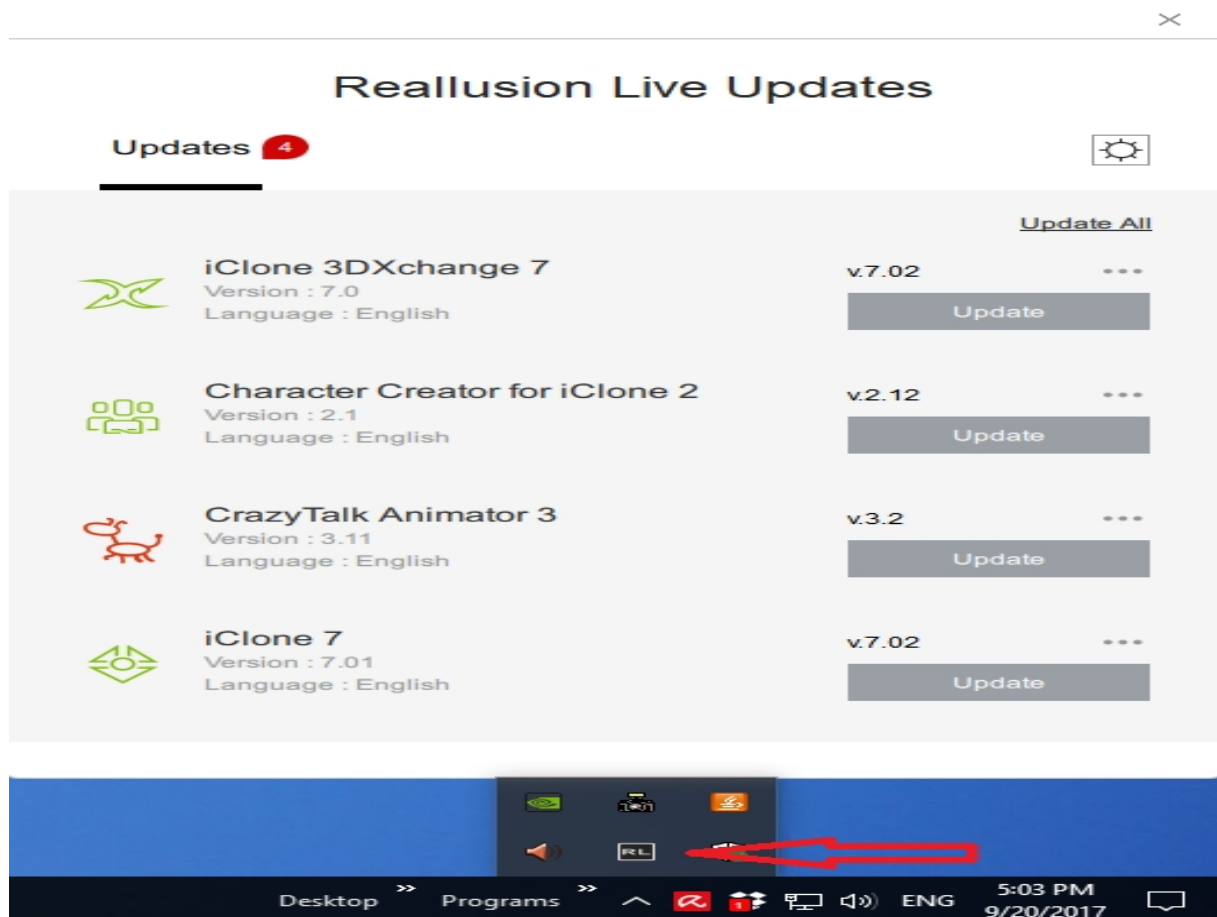

### Windows

"C:\Users\%username%\AppData\Local\Reallusion\RLDownloads\"

### MAC

"~Library\Application Support\Reallusion\RLDownloads\"

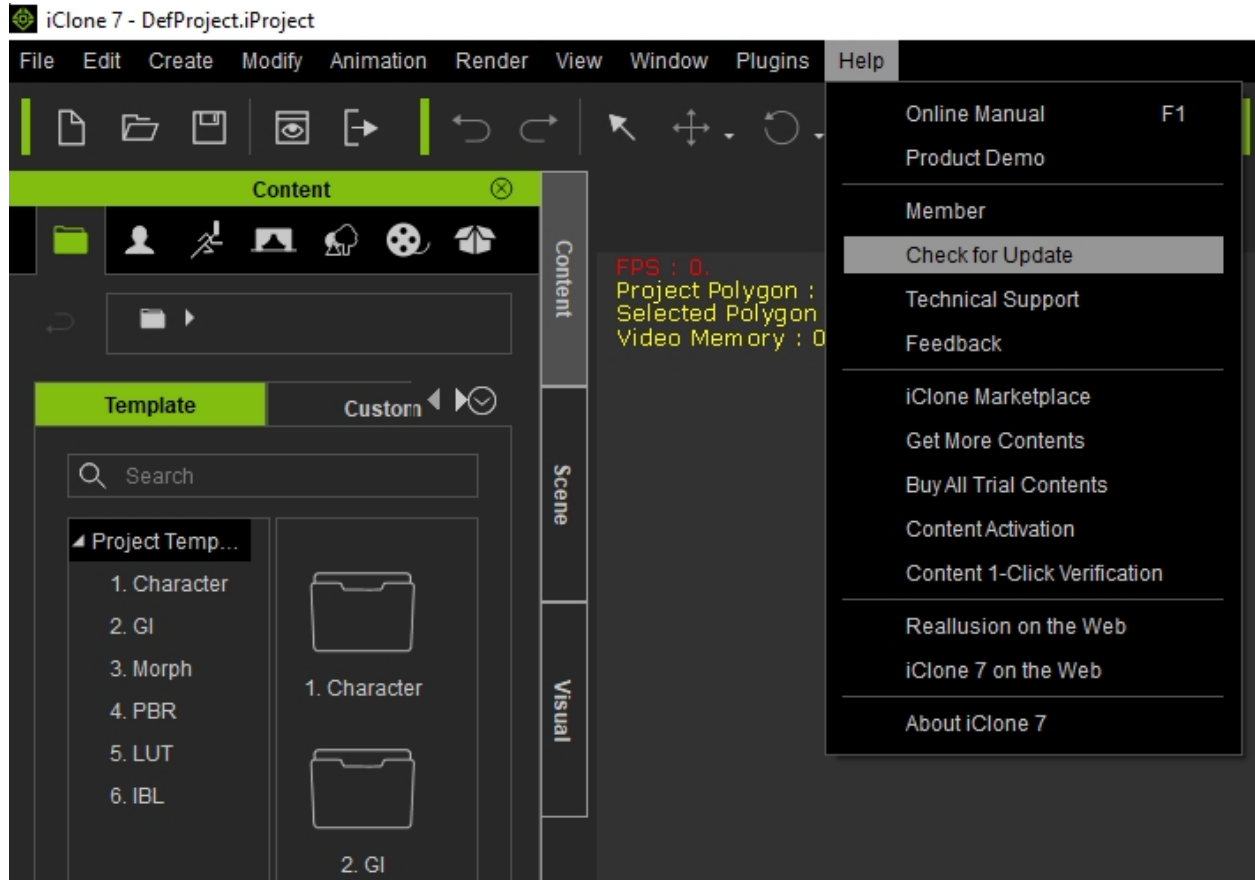

For example: -

There are four methods to updating Reallusion software to the latest version

**Method#4:** Click on the "Help" or "?" buttons found on the upper-right corner of the program, followed by the "Check for Update" option, in which you will be prompted in the "Check for Updates" page to "Download" and update your program.

For example: -
