2 recommended ways for each Reallusion program download source and we use CrazyTalk 7 as example here, just replace the name to the product you installed: -

If your download source from **App Store**: -

Go to Finder, search for "CrazyTalk7", right click on the related application and Move to Trash

--or--

may drag the application directly to Trash can.

More info: http://osxdaily.com/2011/06/20/uninstall-mac-applications/

After this, please using Spotlight to verify and delete if "CrazyTalk7" filenames still exists.

Whereas for download source from Reallusion: -

Go to Finder, search for "Uninstall CrazyTalk7", double click to execute the un-installation of the related application. You might need your Mac logon to complete the operation.

Verification Steps: -

1) Goto Finder, looking for Macintosh HD.

2a) For CrazyTalk7, Run "Remover.app" file at: -

Library > Application Support > Reallusion > Uninstaller > Remover.app/RemoverPro.app/RemoverStandard.app

2b) Whereas for CrazyTalk Animator 2 or FaceFilter 3, please allow Installer Helper to uninstall program by running "Uninstall <program name>-<program edition>.app" at: -

Library > Applicaiton Support > Reallusion > Unnstaller > Uninstaller > Uninstall <program name>-<program edition>.app

3) Double check whether related ".plist" file is being deleted, if not manually delete it: -

Library > Preferences >

com.reallusion.CrazyTalk7.plist/CrazyTalk7Pro.plist/CrazyTalk7Standard.plist

Note: Since CrazyTalk7.3, the "Remover.app" or ".plist" will follow with the Pro/Standard version naming.
