Is there any limitation for the project length?

The default length for each project is 2000 frames and the maximum frame number can be set is 27000 (15 mins). For better performance, it's good to break your projects that is less than 5 mins and later please use an external video editor to merge and compose your work.

To adjust the lenght of project, just go to menu "Edit" -> "Project Settings (Ctrl + Shift + P)".
