How to setup an iPhone server IP address for the LIVE Face app ? (For CTAv3.3 Pro & Pipeline user)

1) Simply download the free **LIVE Face app** from the Mac App Store, and install onto your **iPhone X**. (Skip to Step #2 for second screen shot.)

2) Establish an intranet connection between the iPhone X and the

computer, and make sure that they are on the same domain. You may connect to the same Wi-Fi network or use the iPhone X's hotspot to share a Wi-Fi internet.
