

Can CrazyTalk 7 run on MacOS Catalina (or above version)?

CrazyTalk 7 is a 32-bit program, whereas MacOS Catalina (or above version) only supports 64-bit program.

https://en.wikipedia.org/wiki/MacOS_Catalina

You may purchase an upgrade to CrazyTalk 8 that will support 64-bit. You can contact our Sales Support by raising a new support ticket under "Purchase" question type.
