I have my own way to organize my content through File Explorer, does the Smart Gallery benefit me?

If you always change the content path/name, then the current version of Smart Gallery will not recognize it, and you would lose the benefit of "Pack View" and "Tagging" system. But the other feature will still work for you, listed below.

The future version of the Smart Gallery will support a custom path. You can continue to manage your content the same way, and wait for the future version.

	Inventory	Installation	Pack View
General User (Not change content path)	V	V	V
Manage Content by File Explorer (Change content path)	V	V	X
