

CrazyTalk 8 known issue

Known issue#1: In Catalina OS (or above version), during the 2D Actor face fitting process, the face fitting window would just disappear.

Since CrazyTalk 8 is a legacy product, hence it will no longer be in development, then we might not be able to update some technical questions especially with program crashes. Please make a full evaluation via the trial version before any purchase. We offer 14-days money back guarantee.
