I can not find my Hair content, where is that? (ICv7.9 & CCv3.4)

In order for both iClone and Character Creator to have access to the new generation hair system, we've created three new file formats: rlHairStyle, rlHair, and rlHairElement under

\Shared Templates\Hair.

Consequently, the legacy content located under iHair or ccHair is moved to

\iClone Template\Lagacy Hair and

\Character Creator 3 Template\Legacy Hair.
