--or--

2. Content Store Offer:

Promotional Period: June 17th - 30th, 2021 23:59 UTC

Offer Details: Everyone who purchases the Hair Builder and the Builder Combo from the Reallusion Content Online Stores during the promotional period will qualify for the below limited bonus:

Blender Hair Tool: Hair Tool is an add-on for Blender 2.83 and 2.9x that will help you generate hair-cards based on 3D curves in a non-destructive way. Hair meshes and textures generated from Hair Tool can be converted to [Smart Hair](#) for Character Creator. See the [webpage](#), and [tutorial](#).
Blender Sample File: This is a Blender project provided by the Hair Tool developer. It contains 5 hair samples created with Hair Tool. Each hairstyle is made from curve ribbons grouped into individual collections and has a simplified CC Smart Hair-compatible texture setup. (e.g. they use opacity and depth maps in the material setup.) By using this file you will be able to learn how the final effects were achieved by playing with the settings, tweaking uvs, changing profile, etc. Also, you will be able to see how a layered hair is constructed, and how raw texture maps look like in Blender before exporting.

Blender Hair Tool - Learning Samples (5 Smart Hair Samples): 5 Smart Hair samples (*.rlHair) converted from Blender Sample File. They are the same content as the Blender Sample File, but have already been converted to .rlHair format. Users can find them directly in the CC Smart Gallery.

Bonus Delivery:

For Blender Hair Tool - Learning Samples

If you are an eligible user, you can directly download it from the Smart Gallery.

Or find the Blender Hair Tool - Learning Samples product name in the "Order History" of your member account. Click the "Install.RLD" link to download the .rld files.

OrderID	Product ⇅	Qty	Price	Date(UTC) ⇅	Download	Export	More Info
