

Are the existing iClone 7 Python plug-ins be compatible with iClone 8?

Due to some function changes, some Python scripts will require an update by Python developers. We've contacted these Python developers in early 2022, so that they can adjust their scripts accordingly.

As a developer, you have the right to decide if you wish to release your script for free or as a paid update.

Note: These python plugins will be discontinued on iClone 8: Pose Manager, Spring Joints, Camera Dolly Zoom, Camera Auto-Focus, Audio Driven, Batch Render Folder, Group Manager, Light Remote Control, Joint Driven Morph.

If you have any questions, please feel free to send us a support ticket.
