

Why 3DXchange is discontinued?

3DXchange is discontinued. All related features are integrated into iClone 8 or Character Creator 4. ([Check the comparison table for details](#))

- iClone 8: Any motion FBX files imported into iClone 8 can be automatically retargeted to standard CC characters or non-standard characters.
- Character Creator 4: Besides the characterization features mentioned above, CC4 allows importing any object, editing mesh elements to sub-nodes, and easily turning objects into props, accessories, clothes, hair, shoes, etc.
