

How to Download Content from ActorCore into iClone 8?

All 3D contents in ActorCore are compatible with iClone 8.0 or above. Kindly follow the below instructions on how to download content from ActorCore to iClone.

Method 1:

Download with the Content Manager, please make sure Content Manager is installed first.

Click the Refresh button in the Content Manager, you will find the newly purchased content in its sub-category folder(Actor/Animation/New Purchase). You may even search it with the search bar.

Method 2:

1) First, launch your iClone.

How to Download Content from ActorCore into iClone 8?

<https://actorcore.reallusion.com/inventory>

Click the Download button at the right-lower corner to open the Download Setting panel.

3) Select "iClone/Character Creator" under "Target Application", and then see the "Download" button as the below image:
