

## **Are Reallusion software provided with different versions? What is Standard license & Extended license?**

Reallusion software such as iClone 8, Character Creator, and Cartoon Animator 5 is provided as a single, full-featured version. These are perpetual licenses, meaning there is no time limitation on usage, and users receive all incremental updates throughout the entire version lifecycle. We do not offer different versions of the software itself.

However, for content packs, we offer two types of licenses: Standard License and Extended License. For more details and to choose the license that best suits your needs, please refer to the [Content License page](#).
