If you want to use Live Link for iClone 7 with Unreal Engine 5, you will need to install the iClone 7 Live Link plugin from the Reallusion Hub, AND the Live Link from the Unreal Marketplace too.

But the new features that are supported in iClone 8 will not be supported with iClone 7 version's.

Please try iClone 8 Live Link for the brand-new features.

For the reference, here is the tutorial about the Live Link Unreal Engine 4 UI:

https://www.youtube.com/watch?v=ccICU5Tf-DI

See more info about Unreal Live Link plugin:
