Method 1: Disable Proxy via Internet Properties

1) Open Control Panel (via Windows Search) > Network and Sharing Center > Internet Options.

2) Go to the Connections tab and click LAN Settings.

3) Uncheck "Use automatic configuration script"

4) Uncheck "Use a proxy server for your LAN" and click OK.

Method 2: Disable Proxy via Windows Settings

Windows 10 / Windows 11

1) Open Settings: Press **Win + I** to open the Windows Settings menu.

2) Go to Proxy Settings: Click "Network & Internet", then select "Proxy".

3) Disable Proxy:

a) Use setup script ☐ Turn off

b) Manual proxy setup ☐ Turn off "Use a proxy server"

4) Restart your computer if needed.

-----

Method 3: Modify Registry Settings (Advanced Users)

1) Press **Win + R**, type regedit, and press Enter.

2) Navigate to:

HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Internet Settings

3) Find AutoConfigURL and delete it.

4) Find ProxyEnable and set its value to 0.

5) Restart your computer if needed.

Tip: If one method doesn’t work, try another. Some settings may be enforced by your network administrator or security software.
