

Why doesn't the parallax effect work in CTA5?

At times, you'll discover that the actor does not scale when scrolling the mouse wheel.

While the **Z** value is indeed rising, the actor does not resize in kind. When this happens, try changing the **Project Settings > Camera Settings** parameter from **Orthographic** to **Perspective**.

Why doesn't the parallax effect work in CTA5?

After adjusting the camera settings, the character should properly resize with the scroll wheel.

For more information, refer to the [manual](#).
