

Adding seats to an existing license

If you already have a single-seat license for that product, simply log into your member page, locate the serial number in "[Software Registration](#)" and click on the "Buy" link in "Add Seats column". This method also applies to multi-seat licenses.

Note: Licenses come in two categories: **single-seat** and **multi-seat**. The number of license seats specifies how many computers can install a program under the same license. Only **multi-seat** licenses are automatically shared with other workgroup members and Administrators have the capability to centrally manage and allocate them.

Register Product & Download Patch/Bonus

You may select product type and category to search your registered product, or type keyword to do it.
