

Why introduce the new CC5 HD facial profile? Weren't previous facial animations already compatible with HD-profile characters?

The HD facial profile is a new expression system for CC5. It includes all major Extended expressions and is compatible with legacy CC4 Extended and Standard profile characters. Facial animations are fully cross-compatible among them. For the latest information, please see:

- [Online Manual](#)
- [Official Landing Page](#)

For information on included secondary expressions, visit [here](#).
